

Certificate of completion

This is to certify that

Mr./Mrs. **Mainul Islam** has successfully completed the ERC Space & Robotics Industry Standard practice programme during
European Rover Challenge 2023 (on-site edition) international robotics competition.

The participant has undergone practice in the following modules:

Electronics Engineer (on-site)

A supporting and prosperous position within a subsystem, with standard contribution to electronics and electrical engineering, incl. power delivery and PCB design.

Senior Electronics Engineer (on-site)

A position with a substantial experience in the team, with a significant contribution to electronics and electrical engineering, incl. power delivery and PCB design.

Senior Robotics Engineer (on-site)

A position with a substantial experience in the team, with a significant contribution to robotic arm structure design, arm-to-rover interface, gripper design, and integration.
